Morgan Fanberg – President, Glosten

A graduate of the US Merchant Marine Academy, Morgan Fanberg is a professionally licensed engineer offering 22 years of marine industry experience specializing in marine mechanical and electrical systems. Morgan is currently serving as President of Glosten, a full-service naval architecture and marine engineering firm with offices in Seattle, Washington and Providence, Rhode Island. As President, Morgan has chief responsibility for setting the strategic direction for the firm. Prior to being appointed President, Morgan led Glosten's Marine Engineering Group. In that role, he served as a strong technical resource, a respected leader, and a trusted mentor. Founded in 1958, Glosten's design experience includes tugs, barges, dredges, research vessels, passenger/car ferries, and offshore platforms.
